

**Narsimha Reddy Engineering College
Maisammaguda, Dhulapally, RR Dist, Hyderabad**

Department of Electrical and Electronics Engineering

Name of the Activity: Selfie with Circuit

Faculty Name: M.Jyothi

Subject Name: Electrical Circuits

Topic: Electrical Circuits

Class / Year / Semester: II EEE / 2018-19 / I Sem

Brief Write-up

This is an innovative activity for the first of its kind in dealing with it at NRCM. The electrical circuit plays major role for students of Electrical and Electronics Engineering, it has been decided to make them more problems on circuits for both balanced and unbalanced systems. The students have to complete a problem based on circuits, find various electrical parameters in it and finally have to draw the diagram. After completing all this, they have to take a selfie with the solution and have to post it in the group. This would create a healthy competition among students and try to solve problems covered under this topic.
